Subject: [External] Solar

Good afternoon PUBLIC SERVICE COMMISSION,

Public service implies that you work for the good of the public not the good of Dominion Energy?

I am confident that you will put we in the public first in the case of the solar generators rate hike. We as solar power providers have spent a lot of money to make our planet cleaner and hope for a break in our power bills as a reward. This would negate that.

Also, shouldn't we all be promoting a cleaner future? Why would you want to discourage any solar energy build out? It creates new jobs and also makes us breath less gunk.

I am confident you will make the right decisions on behalf of the people you represent.

Thank you,

Susan Walters
